--ADMIN Pages--

The screenshot displays a web application interface for managing categories. On the left, a dark sidebar contains navigation links: Dashboard, Products, Add product, Categories (highlighted), Orders, and Users. The main content area is titled 'Categories' and features a form for creating a new category. The form has two input fields: 'Name' (containing 'Type here') and 'Description' (containing 'Type here'). Below the form is a prominent red button labeled 'Create category'. To the right of the form, a table lists existing categories with columns for 'Name' and 'Description'. The table contains three entries: 'Antidepressants' (Medications used to alleviate symptoms of depression. Example: Sertraline (Zoloft), Fluoxetine), 'Antibiotics' (Substances that kill or inhibit the growth of bacteria), and 'Analgesics' (Drugs that relieve pain without causing loss of consciousness. Example: Acetaminophen). Each entry has a red 'Delete' link to its right.

Name	Description	
Antidepressants	Medications used to alleviate symptoms of depression. Example: Sertraline (Zoloft), Fluoxetine	Delete
Antibiotics	Substances that kill or inhibit the growth of bacteria	Delete
Analgesics	Drugs that relieve pain without causing loss of consciousness. Example: Acetaminophen	Delete
